“This field has very specific equipment and service needs that only a firm who specializes in, and does a high volume of work in, can perform with consistent excellence. Elm most certainly excels in the field!

- Sandra Shields, Acting DPW Supt.
Town of Greenfield

Water/ Wastewater Services

Elm understands the challenges municipalities face in modernizing out-of-date infrastructures to meet EPA and DEP regulations, and will work to provide a solution that will not interrupt the treatment process. Our full-time staff of licensed electricians, certified technicians, and professional controls engineers provides unparalleled support to the Water and Wastewater Treatment Industry.

Installation Services

We are able to perform power and control installations, customer-specific design-build projects, and turn-key applications, as well as provide daily maintenance support for well or pumping stations.

Calibration Services

Our trained staff is able to install and maintain a facility's process-measuring equipment. We maintain up-to-date calibration equipment and will provide the customer with accurate documentation and certifications.

Control Services

We specialize in meeting control and instrumentation needs. Our staff of systems integrators provides engineering and design expertise that will meet a facility's physical operations, budget, and installation scheduling requirements. We also have a full-time control panel assembly facility on site.

Preventative Maintenance

We offer a number of preventative maintenance services that allow a company to detect problems with machinery before breakdown occurs. These services include: annual service contracts, 24-7 service and emergency support, and infrared scanning.

In addition, we execute a contract with the State Operational Services Division as a registered vendor for FAC29-Tradeperson Repairs and Maintenance Work. Our participation in the SWC program as an authorized Statewide Contracts Contractor enables us to participate in the municipal bidding process for projects under \$10,000. This helps our municipal clients comply with regulations in place under MGL, c.30B for goods and services provided by tradespersons. Elm's vendor code is VC6000161803.
