

- Design-build and turnkey solutions for most industrial applications
- Experienced in challenging production environments
- Attention to detail and highest-quality workmanship
- Disciplined project management methodology
- Outstanding safety record

“ In my humble opinion, Elm sets the standard for how projects should be done and I personally will be using them as a benchmark for future inspections and testing.

— National Accounts Operation Manager

Construction Services Solutions

Elm's experienced construction services group provides ground-up design and build solutions, plus equipment and electrical installations. This work ranges from large industrial machinery projects to integrated control systems to lighting and power systems and upgrades. We have implemented projects across a variety of industrial and utility markets:

- Food and Beverage
- Pulp and Paper
- Plastic and Extrusion Control
- Water and Wastewater
- Steel and Metals
- Mining and Aggregate Materials
- Commercial Building

Our proven team of project managers, foremen, technicians, and electricians is comfortable working in the most challenging production environments. Whether in wet and corrosive paper mills, dusty aggregate quarries, semiconductor cleanrooms, or Class A office space, Elm does it right the first time — paying attention to detail and delivering the highest-quality workmanship. Our installation expertise includes:

- Industrial Power Distribution Systems and Backup Power Solutions
- Industrial Process Instrumentation and Control Systems
- Machine Drive Systems
- Plantwide and Machine Relocations
- Lighting Systems
- Turnkey Installation Services
- Design and Build

We're committed to meeting demanding construction schedules and implementing sophisticated manufacturing technologies. Elm's disciplined project management methodology guides the work from start to finish — delivering your job on time and within budget. And our excellent safety record and dedication to regulatory compliance help extract maximum value from your capital investment.
